

Green Line of Reconnection

With the support of the
Erasmus+ Programme
of the European Union

Erasmus+

ABOUT OUR PROJECT...

The "GREEN LINE OF RECONNECTION" (GLOR) is working to improve the cooperation of mountain clubs in the Balkans by improving mobility, communication and the exchange of good practice between volunteers, mountain guides and other sports professionals.

The project relies on the VIA DINARICA regional project, whose slogan "naturally connects" is precisely the idea of the basis for easier achievement of the set goal. GLOR is a project co-funded by the European Union through the Erasmus + Sport program. The developer of the project is Mountaineering Club "Tara" Bajina Basta, Serbia, and partners are the Cycling and Hiking Association "Hey, the bush forward" Maribor, Slovenia and Mountaineering Association "Željezničar" Gospić, Croatia.

A key part of the project is the organization of three multi-day transnational events, one in each partner country. They will present organizations, examples of good practice, as well as mountain areas where partner organizations perform most of their activities. Particular emphasis is placed on marking the green Via Dinarica route, which naturally connects all partner countries.

A very important aspect of this project is the dissemination of information to other mountaineering organizations. In addition to promotion in various media on social networks, project partners will also continuously promote at major mountain gatherings in the region. Increasing interest and establishing direct contact between

EXCHANGE CROATIA

We started on 7th of May with getting to learn about the history of Mountaineering sport in Croatia, Via Dinarica route and about the protected area of Velebit mountain. Interactive presentations were run by Mile Milkovic, Croatian member of the project team and Alan Caplar secretary general of Croatian Mountaineering Association.

Next morning was reserved for practicing alpine techniques with instructors of Mountaineering Rescue Service from Gospic. Participants was introduced to abseiling descending technique on the rocks of Dabarska Kosa on Velebit Mountain. For the most of participants this was a first time ever to try this kind of activity and, thanks to patient instructors, it was a safe and peasant adrenaline activity.

After lunch in Mountain Hut Kugina Kuca, meeting coordinator Mario Krpanic divided us in three mixed groups so we would be more efficient in the next activity of Via Dinarica trail marking. As the marking system in all three partner countries is the same, and all groups had licenced markers as the leaders it was a great learning experience while, in the same time, we collaborated to improve Via Dinarica. Highlight of the day was a short climb and a great view from the summit Laktin Vrh (1504m) the most pronounced one in Middle Velebit area.

After traveling back to our accommodation in Baske Ostarije the hosts organized a small sunset hiking to Cubus viewpoint, a place with magnificent view to Adriatic seaside and Croatian islands.

Sunday weather was perfect for hike over Premuzic path to Velinac summit (965m). Clear view let us enjoy the view, even being able to see the mountains at the Italian shore.

After descend hosts organized a small tour around Karlobag, a small seaside town near Gospic.

Joint dinner at Baske Ostarije was an opportunity to summerize this very rich exchange and to introduce the plans for the exchanges that were about to happen.

Watch a full exchange video at:
<https://youtu.be/oq3OERp-Agc>

07-10.05.2021.

EXCHANGE SERBIA

The second exchange started in visitors center of Tara National Park in Bajina Basta where the participants were introduced to various topics. History of mountaineering sport in Serbia was presented by Sladjana Biljic, vice president of MA Tara. Via Dinarica trail in Serbia, Via Dinarica web platform and use of GPS technology in mountain sports were presented by project coordinator Nenad Lecic. Treasure of protected area of Tara National Park was presented by Ranko Milanovic head of educational unit of NP Tara.

Day two started with Via Dinarica marking activities. The section from the border with Bosnia and Herzegovina to Nabojne fields was marked using standard Knafelc signage and acacia poles for open field areas.

Afternoon part was reserved for kayaking activities on Perucac Lake. Water based activities started with instructors from Drina Kayaking Club. Marko Marjanovic representative of Serbian national kayak team was the leading trainer to introduce the duo kayaking paddling technique. Participants were mixed so on every single of 12 kayaks there was a partner mix duo. Cro-Slo combination won the small competition organized at the end of kayaking session. Saturday was a day to join together in Drina Regatta, the biggest recreational river-based event in Balkans. Participants had a chance to try to steer huge wooden raft floating downstream together with more than thousand different vessels.

Mountaineering tour from Mitrovac, over most visited viewpoint in Serbia - Banjska Stena, ending at Mountain hut Rastiste was organized on Sunday. We just had a chance to have a look to a wonderful landscape before the mist covered mountain tops.

Exchange was completed with a small party in summer house of Rastiste Mountain Hut where mountaineers from Mountaineering Association Majevisa, coming from Srebrenik - Bosnia and Herzegovina joined us, making this ex-YU reconnecting even better.

Watch a full exchange video at:
<https://youtu.be/VBN2XrrlpKA>

EXCHANGE SLOVENIA

The last exchange started with meeting in the Arena hotel, in outskirts of Pohorje. After short introduction made by project coordinator and hosting organisation representative Igor Opresnik, history of mountaineering and organization of Mountaineering Association of Slovenia (PZS) was presented by its secretary general Damjan Omerzu. Presentation of one of the most important programs of PZS - Hiking for disabled persons (inPlaninec) was presented by Marjeta Cic and Jurcek Nowak, founders and volunteers of this complex inclusionary idea. Pohorje mountain area was presented by Matija Zlender.

Next day, after our transfer to south-eastern part of Slovenia, in Sviscake mountain house, we got to learn about Via Dinarica part in Slovenia from Dejan Iskra representative of Regional Development Agency Zeleni Kras. From this point we started recovering old sign marks in direction of Veliki Sneznik (1796m) highest summit of Slovenian Dinarides. After rewarding view from the top we climbed down and transferred to dinner place in Lukovica.

Saturday was a day for biking. We started just in front of our hotel and made a tour over Pekre, Limbus, Laznica and Ruse. After refreshment we ride back by Drava river finishing the biking tour in Maribor city center. There we took an interesting walk around Maribor finishing it at the top of Piramida hill. Evening was planned for visiting Zavrh, Maistro tower and having dinner in Schumann - biodynamic approach vinery.

The last day was a hiking day. A tour over beautiful landscapes of Pohorje finishing with a lunch at Tisa Hotel. There we had a chance to sum down this exchange, but also a the results of our GLOR project.

As we assumed a good mix of learning activities and outdoors made our friendship much stronger. We agreed to spread this beautiful story of cooperation to the clubs around Balkans, as this seems like a very simple way to truly get to know and understand each other. Symbolically we agreed to have a joint climb to the highest summit of former Yugoslavia next year, and to develop stronger sustainable bonds after our GLOR project is finished.
